

REFERENCE: THORUP STRAND ICE PLANT

THORUP STRAND ICE PLANT

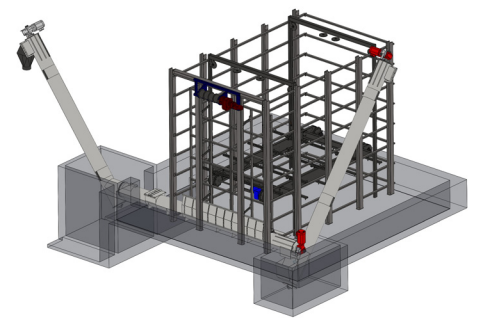

The fishermen at Thorup Strand invested in new facilities including landing and cleaning, packing and processing, fish shop and a restaurant.

For the cleaning, packing, processing and the fishing boats we supplied an ice rake system with a customer handling system.

The ice delivery system supplies the factory with ice on demand. Delivery to the fishermen outside the building can be accessed by the access panel.

The storage system controls the need for ice production. When the storage level reaches the low level it calls for ice production.

The ice production is made by NH3 Kølegruppen.

DETAILS

- BUUS ice maker
- Flake ice
- Produced at -20 til -33°C

OTHER INFO

- Thorup Strand Kystfisker Lag
- NH3 Kølegruppen
